Too many Grid Outages and no power reliability?

Ensure Zero interruption of power despite grid outages with Battery integrated Solar PV solution
Enhanced Energy Independence, Reduced Monthly Demand Charge

Key Features:

1. Leading Lithium-ion/Led battery technology
2. State of the art energy management system
3. Available on both Opex & Capex
4. Modular system easy to expand
5. Long life ~ 15 years

WHAT SETS EGSCorp APART?

Quality Focused

Design Expertise

Safety Focused

The Eco Global Sales Corp Advantage

Awards & Industry associations

Well diversified Tier-1 customers

QUALITY FOCUSED

Eco Global' focus on quality has ensured consistency in 1400+ projects across Punjab

Full Control on Quality

In-house Exhaustive field quality plan

Every module and Component certified by Leading 3rd Party Auditors

Procured from global Tier 1 suppliers only

100% DISCOM certified Workmanship on site

Professional Material handling and storage at your premises

What this means for you:

Reliable Products for 25 years

Consistent performance till the end of the project life

Non-Intrusive project construction with no damage to your property

Quick turnaround in project timelines

Every component including imported tier 1 modules tested by independent certifiers before purchase ensures there are no defects in your plant

DESIGN EXPERTISE

We understand the criticality of system design in a solar plant as design flaws cannot be fully rectified post construction.

Eco Global has developed in-house expertise, both electrical and structural, unmatched in the industry.

Non-standard structure designs capabilities such as carports, mounting structures & super structures

100% in-house technical designs that are shared transparently

Generation prediction using in-house analytics system deviation

Structures to suit your objectives and requirement:

What this means for you:

Design & forecast expertise adds to Asset Performance contributing to 98% accuracy in forecasting generation

Our right-first-time design execution precludes any need for revision in the system once setup

System Design is customized based on energy requirement, On-site space availability and Roof type
